

We listen to Klove broadcast on 88.3 in Norfolk on a regular basis. It provides a source of programming not otherwise available to the community. Many of our friends also listen to this as an alternative to other radio programming which we often find offensive and distasteful. In addition, there is an alternative new source provided with information not often heard otherwise. I find that listening to KLove and Public Radio provide a fairly balance view of the news. My wife depends on the music on Klove for a calming effect. She works in the local school system. Thank you for listening.
